

FortiClient™

Endpoint Security – Anytime, Anywhere

FortiClient is an all-in-one security solution designed for organizations seeking comprehensive secure connectivity protection. With FortiClient, remote users can leverage the next generation of secure access from anywhere at anytime. Corporate security policies can be enforced and protected wherever people need to be – including home offices, airports and hotels – anywhere wired or wireless Internet access is available.

The power of FortiClient includes IPSec and SSL VPN for encrypting traffic, two-factor authentication for secure user identification, endpoint control to ensure that non-compliant devices do not access the network, and WAN optimization for bandwidth optimization and decreased download time. FortiClient is designed to meet the requirements of both small and large organizations and is backed by Fortinet's award winning security technology.

In addition, FortiClient offers:

- Straightforward Licensing – ALL FortiClient functionality is included for one low price.
- Simple Deployment and Management
- Custom Configuration – Administrators can predefine configuration and deploy features selectively. Designed for coexistence with other end point client software.

Features	Benefits
VPN Policy Server	<ul style="list-style-type: none"> • Easily create client-to-site encrypted tunnels on the fly • Premise awareness • XAuth capability
Endpoint Control	<ul style="list-style-type: none"> • Lock down network access based on organizational security compliance policy • Checked installed and/or running 3rd party application software • Customize warning and blocked messages
WAN Optimization	<ul style="list-style-type: none"> • Minimize remote user download times supporting: CIFS, FTP, HTTP, MAPI, and general TCP Traffic • Graphical view of bandwidth optimization
Simple GUI	<ul style="list-style-type: none"> • A new graphical user interface
Two-Factor Authentication	<ul style="list-style-type: none"> • FortiToken, Email and SMS-based two factor authentication • Certificate Store Integration

DATASHEET

Integration with Gateway Devices

- FortiClient simplifies endpoint security through close integration with the industry-leading FortiGate line of Unified Threat Management devices.

Benefits of Fortinet Infrastructure Integration

- Endpoint access based on installed and/or running application software
- Provides a mix of IPSec and SSL VPN policy configuration which resides internal to the organization and can be pushed out to users
- Custom endpoint characteristic profiles to lock down network access based on organizational compliance policies
- Simplified endpoint licensing based on number of concurrent connections to FortiGate appliance.
- Simple “drag and drop” report creation
- Branded/logo-based management reports
- Reports generated at any time – scheduled or ad hoc

World-Class Technical Support

Support plans include a 8x5 or 24x7 comprehensive phone support for mission critical deployments. FortiGuard Security Subscription Services deliver dynamic, automated updates for Fortinet products. FortiCare Support Services provide global support for all Fortinet products and services. Professional Services optionally available for design and deployment. 90-day limited software warranty.

Technical Specifications	
Operating System Supported	Windows XP 32-bit and 64-bit Windows 7 32-bit and 64-bit Windows Vista 32-bit and 64-bit Windows Server 2003 32-bit and 64-bit Windows Server 2008 32-bit and 64-bit
Encryption	AES 256 and 3DES
Deployment Options	Manual Interactive Manual Silent Active Directory GPO Third Party Distribution Tools
Authentication Options	Radius LDAP Local Database SecureID XAUTH TACACS+ Digital Certificates (X509 format) FortiToken
VPN Protocols	SSL (Tunnel Mode) IPSec
Wan Optimization	CIFS, FTP, HTTP, MAPI, General TCP traffic
Connection Options	System icon Manual/Automated configuration of FortiClient VPN tunnels
Simple Client Management	Customizable user interface
